Guys;

When will I receive the courtesy of a status update let alone a full and helpful reply. No point ordering a \$300 GRIN charger from you if I cannot confirm it will do what I want, ie, charge my pack to 100% whenever I have an immediate and longish ride planned.

This is all most weird as in why would you not reply to a simple enquiry? Or, is there something serious that you feel you have to hide? Let the rumor mill have at it?

Please reply.
