## Product name and model

Electric bicycle intelligent LED instrument, model: KD26E.

## Specifications

- 24V/36V/48V Power Supply
- Rated working current: 10mA
- The maximum working current: 30mA
- Off leakage current: <1uA
- The supply controller working current: 50mA
- Working temperature: -20℃~ 60℃
- Storage temperature: -30℃~ 70℃

## Appearance and Size

Display appearance and dimension figure (unit: mm)

## Function Summary and Button Definition

### ◆ Function Summary

KD26E can provide a lot of functions to fit the users' need. The indicating contents are as following:

- Smart battery indicator
- Assistance-level indicator
- The push-assistance function
- The Lighting On/Off (optional)

### ◆ Button Definition

There are three buttons ( **M**, **+**, **-** ) on the KD26E display that represented by the following functions respectively **MODE**, **UP** and **DOWN**.

## General Operation

### ◆ Switching the eBike System On/Off

To switch on the eBike system, hold the **MODE** button for 2s.

In the same way to hold the **MODE** button for 2s again, the eBike system will be switched off.

When switching off the eBike system the leakage current is less than 1 uA.

■ When parking the eBike for more than 10 minutes, the eBike system will switches off automatically.

### ◆ Switching the Lighting On/Off

To switch on the display headlight of the eBike, hold the **UP** button for 2s. The battery indicator light and power assistant level indicator light became faint at the same time.

In the same way to hold the **UP** button for 2s again, the headlight will be switched off. The battery indicator light and power assistant level indicator light recover at the same time.

### ◆ Switching Push-assistance mode On/Off

To access the push-assistance mode, hold the **DOWN** button always, the eBike will go on at a uniform speed of 6 Km/h. Three power-assistance level indicator lights flash at the same time.

The push-assistance function switches off as soon as you release the **DOWN** button.

■ **Push-assistance function may only be used when pushing the eBike. Danger of injury when the wheels of the eBike do not have ground contact while using the push-assistance function.**

### ◆ PAS Level Selection

Assistance level indicates the output power of the motor. The default value is level "1".

Press the **UP/DOWN** button to select power assistant level, the default power ranges from level "0" to level "3". The output power is zero on Level "0". Level "1" is the minimum power. Level "3" is the maximum power.

### ◆ Battery Indicator

The five battery bars represent the capacity of the battery. The four green lamps are lighting when the battery is in high voltage. When the battery is in low voltage, the left lamps will be red to notice that the battery needs to be recharged immediately.

## Operation Cautions

Be careful of the safety use. Don't attempt to release the connector when battery is on power.

- Avoid the risk of collision.
- Don't modify system parameters to avoid parameters disorder.
- Make the display repaired when error code appears.

## Quality assurance and warranty scope

### I Warranty

- 1) The warranty will be valid only for products used in normal usage and conditions.
- 2) The warranty is valid for 24 months after the shipment or delivery to the customer.

### II Other items

The following items do not belong to our warranty scope.
