

Stromer's first Speed Pedelec

**with belt drive – durable, low maintenance,
easy-care and customizable**

Stromer ST2 – Dedicated to Drive

When Stromer launched the ST2 in 2014, it was the first-ever fully connected Speed Pedelec. With the completely redesigned ST2, Stromer is once again breaking new ground: For the first time, a durable, low-maintenance and absolutely oil-free belt drive works together with a hub gear and Stromer's proven rear-wheel motor to supply powerful propulsion.

Technology that speaks for itself – Extra power for the Launch Edition

The 5-speed gear shifting from Sturmey Archer with a transmission ratio bandwidth of 243 %, the new belt drive made of carbon and Stromer's most powerful battery with 983 Wh and a range of 180 km help to make the Launch Edition, the ST2 LE, into the ideal replacement for the car – on the way to work, to go shopping or in your free time. Thanks to the interplay between the carbon belt drive from Gates and the 750 watt / 40 Nm CYRO Drive IG rear-wheel motor, the ST2 accelerates powerfully, dynamically and virtually silently from the very first push of the pedal.

Typical Stromer

You can spot the ST2 from far away, and not just because of the daylight integrated in the head tube: Stromer's clean and tidy design in combination with smart technology has already won the brand several awards and is also causing a sensation on the ST2. Large-volume 27.5" tires offer a safe grip on the road and the riding position can be adapted to achieve the perfect riding comfort. Full connectivity through integrated Bluetooth and 3G technology connect the bike and the rider and offer a number of options from anti-theft protection with GPS localization, Smartlock (automatic locking and unlocking), over-the-air updates and individual motor settings as well as statistics. The battery can be removed "keylessly" by briefly tapping the touchscreen. The unwaveringly reliable drive guarantees incomparable Stromer riding fun with support up to 45 km/h.

Launch Edition special equipment and delivery date

The Launch Edition of the ST2 will be available from specialist bicycle dealers from October 2020 and comes exclusively with the powerful 983 Wh battery and the Stromer Amsterdam Double Bag 30 l. Beginning in February 2021, the standard ST2 model will follow, available in Royal Blue and Dark Grey with sports frame (M & L) or comfort frame (M) and equipped with the BQ618 battery (range up to 120 km). Stromer offers its standard model with various factory options: For additional riding comfort there is a suspension fork and a suspension seatpost and for an even larger range, as with all models, there is the option of a battery upgrade to the BQ982 (range up to 180 km).

Technical data

ST2 LE:

- Carbon belt drive from Gates
- Motor: CYRO Drive IG – 750 W / 40 Nm
- 983 Wh battery (up to 180 km)
- Shifting system: 5-Speed by Sturmey Archer
- Connectivity via OMNI app
- Sports frame in Medium and Large
- Paint finish in Royal Blue
- Incl. Stromer Amsterdam Double Bag 2 x 15 l
- **RRP for the ST2 LE: EUR 6,899/CHF 7,374***

* Incl. TCS membership, mobility insurance and theft coverage (CHF 5,000) for 1 year.
