## DESCRIPTION

Oil seal NBR 16x30x4,5mm. This type of seal is used for example on the crankshaft of Peugeot 103, but fits elsewhere, too. Just compare the dimensions with original.

- Dimensions : 16 x 30 x 4,5 mm
- Material : NBR

## QUESTIONS ABOUT THE PRODUCT

## NOTES AND SAFETY

### WHAT DOES A GASKET DO?

There are many different types of gaskets or gasket sets in an engine, e.g. [cylinder gaskets](#), intake gaskets, oil seals, crankcase gaskets, [exhaust gaskets](#), [carburetor gaskets](#) or [engine gasket sets](#). They all have the same function: **to prevent leakage between components.**

### WHEN AND WHY SHOULD YOU CHANGE AN ENGINE GASKET?

When servicing your two-wheeler or noticing leaking fluids, be sure to follow this one important rule: **Always replace an old gasket with a new gasket.**

Damaged or worn gaskets can no longer do their job properly, the parts that have to be sealed are no longer adequately sealed, which can lead to serious follow-up damages.

Before you install a new gasket, you must **thoroughly clean and degrease the sealing surface.**
