Includes alloy fork and stem mount

Includes alloy fork and stem mount

Includes alloy fork and stem mount

Our e-bike lights are powered by the motor of an e-bike and need to be manually installed. Proper installation may require some disassembly of the bike and motor (depending on make and battery type) and additional wiring to connect the light to the motor. Please contact the e-bike or motor manufacturer for installation instructions. It is highly recommended to have a trained, e-bike professional install your lights for you.
